SUMMARY

Full-stack engineer with **3+ years** building and running production platforms end to end: React front-ends, PHP/Laravel and Node APIs, a **Go payment service**, a React Native app, self-hosted email infrastructure (**KumoMTA**) and AI agents. I own systems from database indexes and payment reconciliation to UI polish and monitoring.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Go, SQL, C++ **Frontend:** React, Next.js, Redux Toolkit, Tailwind, MUI, Framer Motion, PWA

Backend: Node.js/Express, Go (chi), Laravel, plain PHP, WordPress plugins, REST, JWT, webhooks, cron workers

Mobile: React Native, Expo, EAS **Data:** MySQL (indexing, transactions), MongoDB, Firebase **AI:** OpenAI, Gemini, Claude, OCR

Payments & messaging: Razorpay, Cashfree, Stripe, Amazon SES, SendGrid, KumoMTA, WhatsApp Cloud API, Pusher, Socket.io

Cloud & DevOps: AWS EC2/S3, Caddy, Nginx, PM2, systemd, Playwright, GitHub Actions, Vercel, Git

EXPERIENCE

Full-Stack Developer | **Internship Studio** May 2025 – Present

Ed-tech platform for internships, exams, training and hiring · Pune

- **Student dashboard** (dashboard.internshipstudio.com): React + PHP/MySQL. Built the Campus Ambassador program, Global Internship checkout, AI resume autofill (OCR + LLM) and canvas-to-PDF certificates.
- **Payment service in Go**: rewrote the Node backend (Razorpay + Cashfree). Signed webhooks, a reconciler and status-page recovery all settle through one idempotent MySQL transaction, so paid students are never left un-enrolled.
- **Admin suite** (adp.internshipstudio.com, 190+ screens): Netcore-style email/WhatsApp automation with provider failover and spend guardrails, a self-hosted **KumoMTA** panel (5 IPs, warm-up, health scoring), Caller IQ, an in-house helpdesk, LMS, task manager with a Slack app, and **AI agents** with budget caps.
- **Recruiter portal** (hire.internshipstudio.com): AI job posting with Gemini; replaced N+1 candidate search with batched queries and covering indexes.
- **Mobile app v2** (Play Store): Expo/React Native rebuild with native payments, Pusher chat, deep links and attribution matching the website.
- **Synthetic monitoring**: Playwright on EC2 sits the exam and opens checkout every 15 min; throttled email/Slack alerts with screenshots.

Full-Stack Developer | **Novacred Pvt Ltd** Aug 2023 – Apr 2025

RegTech / KYC · Laravel, React, MySQL

- **RegTech API** (regtechapi.in): KYC and verification API platform with a React dashboard and a Laravel + MySQL backend.
- **CollectKart** (live): collection and document-verification product; **Docboyz** app: DigiLocker sign-in for field agents.

MERN Stack Developer | **Spring S Pvt Ltd** Apr 2023 – Jul 2023

- Built a MERN e-commerce app (admin CRUD, auth, Stripe checkout) and a Next.js marketing site (Crime Look).

FREELANCE

- **Avir Client Portal** (avirhealthpac.in): custom WordPress plugin. Hospitals track licences and accreditations live; staff manage templates, steps, documents and payments; leads captured from 5 form plugins.
- **MM Capital** (mmcapital.in): React 19 + Vite marketing site for an IPO/M&A advisory, with CSS-only motion and per-route SEO.

PERSONAL PROJECTS

Netflix Clone (React, TMDB) · Easy Chat (React, Node, Socket.io) · Sorting Visualizer (React) · more on GitHub

EDUCATION

B.Tech, Computer Science · KJ College of Engineering, Pune 2019 – 2023 · **CGPA 8.43**

HSC (PCM) · Moledina Junior College 2018
